COVID

PCR: COVID-19

Specimen: Naso-pharyngeal Swab.
Methology: SARS-CoV-2 Fluorescent RT-PCR

Results

Control of Extraction and PCR steps	Successful	29/7/22 18:48
SARS-Cov-2 genes (RDRP, N and E, or RDRP and N)	Detected	29/7/22 18:48
Fluorescence Intensity	High	29/7/22 18:48
Ct	19	29/7/22 18:48
Conclusion	Positive	29/7/22 18:48
Interpretation	NEVER END ISOLATION BASED ON NEGATIVE PCR RESULT OR CT LEVEL ALONE. DOING SO WILL POSE A RISK FOR PEOPLE AROUND YOU. Take a symptoms based approach and always consult your healthcare provider for isolation/quarantine decisions. Specimen is POSITIVE for SARS-COV2. Isolate yourself for 2 weeks even if you are asymptomatic or having mild symptoms. Advise all contacted persons in the past 7 days to be tested. For any inquiries related to COVID-19 do not hesitate to contact MOPH hotline: 1787 You are kindly requested to inform the MOPH about your positive SARS-COV2 result by calling 1787.	29/7/22 18:48
